**Subject:** Application to the position : junior software developer

**Date:** 12 décembre 2022

---

Dear Sir,

I graduated from the university of Strasbourg, France and heard about Murex' company through the Seekube platform. I would like to be part of your teams as junior software developer.

I'm interested in Economy / Finance as an amateur since a few years as well as the entrepreneurship and would like to build up a professional background in close touch with experienced leaders. During my year spent in the United States, I developed TDDFT simulations in Python and C++ as a Research Assistant and I'm now willing to apply it to new innovative financial solutions.

Murex is the leader in financial markets-applied softwares in France and offers carrier opportunities all around the world. Joining the group sound like a great carrier plan and motivates me take part of the adventure.

I'm curious and always need to learn and get out of my comfort zone. The scientific method is my way to make progress and I love working in small teams with boiling minds, ready to catch new ideas.

Looking forward to reading from you.

Best regards,

Antoine Herrmann
